

Participant Information Sheet

Primary School Students

COVID-19 Schools Infection Survey 2 (SIS2)

We would like you to help us find out who has had coronavirus!

We are carrying out a study to try and find out how many children have had the virus in the past.

We are asking children in your school if they would like to help us by taking part.

There is one part to the study. We will come to your school to collect the information we need.

Saliva swab

You will need to rub a small sponge into your mouth for two minutes, like brushing your teeth. We will then use this to see if you have had coronavirus before.

Thank you for thinking about helping us. If you are happy to take part, your help will be really important for us to learn more about coronavirus to keep the country safe.

You do not have to take part if you don't want to. You can say no at any time.
